IT & Management: Phishing & BEC Prevention Policies

Welcome to the fifth installment of the eRisk Cyber Campaign. These monthly messages are sent to the Member Designated Representative and the identified key contact for eRisk Hub. If a key contact has not yet been identified, please send their information to crl.memberservices@countyre.org.

We invite you to motivate your county members to take part in the campaign. Leverage CRL's resources to enhance your risk management efforts. Your engagement helps strengthen all of our counties!

Stop Phishing at the Source: Implement These Security Policies

An executive receives a spoofed email from what appears to be a Chief Financial Officer (CFO) requesting a fund transfer. Lacking a firm policy and training, the request is approved without verification. This results in lost funds.

Phishing attempts are inevitable—but a strong policy framework can protect our organization from falling victim.

- If you do not have these policies in place please download and customize Security Awareness Training and Education Policy, BEC Prevention Policy, and the Phishing Prevention Policy templates to use as starting points.
- Ensure company-wide security training to prevent phishing attacks before they happen.

Reminder for IT Managers: If your Cyber Risk Profile indicates weaknesses in BEC or phishing

prevention, now is the time to implement necessary policy controls.

The entire Cyber Resilience series is available today. To learn more and/or complete these actions, log into the eRiskHub to visit the Cyber Resilience page.

Please contact curl.memberservices@countyre.org with general questions regarding the campaign. For technical questions concerning the eRiskHub portal, contact Net Diligence at eriskhub@netdiligence.com.
