Employee Awareness: Secure Passwords & Access Controls

As announced during the Net Diligence eRiskHub webinar on March 7, 2025, the eRiskHub Cyber Campaign is officially kicking off today! Each member designated representative has received a unique brochure tailored to their organization. Please reach out to crl.memberservices@countyre.org for any inquiries regarding the brochure or to seek further clarity on any aspect of this campaign. If you were unable to attend the webinar, we invite you to watch the recorded session linked below.

Net Diligence has developed for CRL Members a comprehensive guide consisting of three essential steps designed to empower CRL Members and their members in implementing tools and resources to protect their organization.

- Step 1: Encourages you to protect your network
- Step 2: Focuses on how to prevent cyber fraud
- Step 3: Prepares you for any potential incidents

These steps are broken into a series of 10 monthly emails that are being sent directly to the Member Designated Representative and the assigned key contact for eRiskHub. If you would like to identify a key contact person for eRiskHub please send the contact information directly to crl.memberservices@countyre.org.

We are excited to kick off the campaign with the first email below: "Your First Step to Cyber Security: Strong Passwords & Secure Access". We encourage you to proactively engage your county members to participate in these activities. Let's harness the resources available through CRL to empower your efforts, ensuring that our counties are equipped to manage risks effectively and confidently. Your active participation is key to our collective success!

Your First Step to Cybersecurity: Strong Passwords & Secure Access

Imagine an employee reusing a weak password across multiple accounts. A cybercriminal gains access to that employee's email, then moves laterally through the organization's network. By maintaining strong passwords and following access control policies, this breach could have been prevented.

Welcome to our NetDiligence Cyber Resilience Series—a journey to strengthening your digital defenses. This first step focuses on securing access to critical systems. Weak passwords and improper access controls are the easiest entry points for cybercriminals. Log onto your eRiskHub platform and take the steps below to ensure you have a secure password.

- Watch the "Creating Secure Passwords" training video.
- Learn how to create and manage passwords that hackers can't crack.
- Consider using a password generator to create strong passwords.
- Consider using a password manager to store your strong passwords.

Please contact crl.memberservices@countyre.org with general questions regarding the campaign. For technical questions concerning the eRiskHub portal, contact Net Diligence at eriskhub@netdiligence.com.
