October Edition

IT & Management: Incident Response Planning

Welcome to the eighth installment of the eRisk Cyber Campaign!

Each monthly message will be shared with both the Member Designated Representative and the assigned eRisk Hub contact. If you still need to assign one, please email their contact information to crl.memberservices@countyre.org.

We encourage you to keep the momentum going by engaging your county members. The tools from CRL are here to support you in strengthening risk readiness across the board. Your role is essential to our success!

Does Your Organization Have an Incident Response Plan?

A malware outbreak hits critical servers. Because there is no formal incident response plan, it takes days to coordinate a response, resulting in significant downtime. With a structured plan, the damage would have been minimized.

A cyber incident can escalate quickly if there's no clear response plan in place. Take action now:

- Implement clear, accessible channels and procedures for reporting cyber incidents, emphasizing promptness and evidence preservation, while ensuring confidentiality. This includes designating specific contacts and providing detailed guidelines to employees.

- Review and update your Incident Response Plan (IRP). If you do not have an IRP please see our Response Planning section in the Learning Center to guide you in creating one.
- Schedule an annual review to keep response procedures up to date.

Reminder for IT Managers: Your Cyber Risk Profile outlines incident response planning as a priority. Ensure these measures are fully implemented.

The entire Cyber Resilience series is available today. To learn more and/or complete these actions, log into the eRiskHub to visit the Cyber Resilience page.

Please contact crl.memberservices@countyre.org with general questions regarding the campaign. For technical questions concerning the eRiskHub portal, contact Net Diligence at eriskhub@netdiligence.com.
